# 1780x525x750 HIGH 2 TIERED BENCH KIT

**VASELINE INSIDE ALL STRAIGHT  
TUBES BEFORE ASSEMBLY**

## GENERAL DESCRIPTION

A bench consists of a series of tubes joined together at the corners by a variety of welded fittings as detailed.

## VASELINE JOINTS BEFORE ASSEMBLY

It is important that all straight tubes be Vaselined inside each end prior to joining them to the appropriate fittings. If this is not done, it may not be possible to pull the bench apart at a later date.

## ASSEMBLY

Bench may be assembled in layers in situ or away from its final position. The bottom layer may require levelling before adding mesh and uprights. Lower next level onto these uprights. Repeat procedure for top layer.

If it becomes necessary to tap fittings into tubes, use a rubber mallet or a piece of timber to protect the fittings. Use cable ties supplied to secure top layer to frame.

## COMPONENT LIST

### FITTINGS

- 2 - A with rubber feet
- 2 - B
- 4 - G
- 2 - k (350 with spigot)

### TUBES

- 2 - 100
- 4 - 450
- 4 - 1610

### MESH

- 1 - 1780x375 folded
- 1 - 1780x600 notched & folded
- 4 - black cable ties
